## Astrology prediction On the Current Global Crisis

Again, quite a few of you have requested me to post my Astrological point of view on the current global crisis. Here is my brief response in plain English to queries from you (on the end of the current global crisis):

Astrologically, things will improve post April 22 after some critical multiple transits. This date marks **PHASE 1** of the beginning of the end of this crisis. The next milestone date is Sept 20, 2020. This date marks **PHASE 2** of the beginning of the end of this crisis.

Subsequent to PHASE 1, this threat will taper and, globally, we will be able to mitigate the high levels of health risks that we are experiencing today.

Between Phase 1 and Phase 2 there will be a temporary relief but a resurgence is expected in middle of June 2020. So, during this interim phase (between Phase 1 and Phase 2), it's critical that each of us be socially responsible and exercise restraint, social distancing, not congregating in large groups etc. Allopathy medication is NOT the solution for this virus. Follow traditional methods of increasing your immunity.

### Order of recovery:

First out of the gate will be US, followed in a subdued way by India, EU/UK will suffer until Sept 2020, China will suffer for 1 more year (although they may not publish the suffering).

Of course, it will take a while to recover from the global setback that it would have caused by then. **The effect of this crisis on an individual is dependent on the individual horoscope.** So, consult a knowledgeable Vedic Astrologer that may be known to you.

Sit tight, think normal, and stay safe. Connect yourself with the highest and **only** form of reality. Do not expose yourself to any health or financial risks/adventures until then!
